

Environmental Permitting

Environmental permitting is essential to ensure project compliance within regional regulatory frameworks.

Overview

Green Plan Ltd. Environmental Consultants have experience securing project approvals and ensuring compliance under the following legislation:

- Alberta Wetland Policy;
- Canadian Navigable Waters Act;
- Environmental Protection and Enhancement Act;
- Fisheries Act;
- Historical Resources Act;
- Migratory Bird Convention Act;
- Public Lands Act;
- Species at Risk Act;
- Water Act, including the Alberta Code of Practice; and
- Wildlife Act.

Green Plan Advantage

Green Plan Ltd. works alongside our clients towards the common goal of seeking the required approvals for their planned or ongoing developments. We strive to ensure transparency throughout the process, reducing unexpected costs or delays. Our experienced staff have an extensive working knowledge of common regulatory pathways, allowing us to operate in an efficient and timely manner. Lastly, we focus on industries that we understand and are experienced with to ensure each project receives the appropriate attention required for positive outcomes and client satisfaction.

Green Plan Ltd. employs professionals who understand the applicable regulatory processes required for a multitude of developments.

Our team takes a practical and transparent approach to permitting, recognizing that unexpected delays can have costly consequences.

With over 30 years of consulting experience, you can trust our team to deliver cost-effective, reliable and professional services.
